**LABTECH LABORATORY CENTRIFUGES**

The line of laboratory centrifuges recently released by LabTech is already encountering the wide favor of the market.
All needs of a modern lab can be virtually satisfied with the 15 models available.
From small micro to floor-standing large-capacity, from ventilated to refrigerated, from low to high speed any lab manager can find a solution to her/his problems.
A centrifuge itself is nothing without the so called (improperly) accessories. This is why LabTech offers an incredible array of rotors (fixed angle and horizontal), windshields, buckets (open and sealed), adapters, containers, and so on to optimize the daily mission of the lab.
