Grant Instruments unveils newly-designed 21-model water bath range: the Aqua Plus series

- Extensive range of unstirred, shaking and boiling water baths offer exceptional value-for-money, and come with Grant's renowned high quality and reliability built-in
- New usability features include drain taps, temperature presets, countdown timers, front panel lockout and non-drip polycarbonate lids and bases

CAMBRIDGE, UK, 1 June, 2010 - Grant Instruments (www.grant.co.uk), a world-renowned supplier of scientific, life sciences and data acquisition products, has unveiled a newly designed, precision engineered, 21-model range of high quality, competitively priced unstirred, shaking and boiling water baths - the Aqua Plus series.

The Aqua Plus series is marketed in four distinct families - SUB Aqua Plus digital unstirred baths, JB Aqua Plus analogue unstirred baths, GLS Aqua Plus series linear shaking baths and SBB Aqua Plus series boiling baths. The new models are unbeatable for everyday use, offer exceptional value-for-money, and come with Grant's renowned high quality and reliability built-in.

Boasting new usability features such as drain taps, temperature presets, front panel lockout, countdown timers and non-drip polycarbonate lids and bases, the new, easy-to-use, robust and reliable baths are designed to meet the ever changing needs of laboratories worldwide, including life sciences and educational establishments.

Like all Grant products, the new water baths are built to last. They meet CE and CSA standards (Grant has its own CSA accredited test facility). The baths are manufactured in Grant's UK production facility, using only the highest quality materials and come with a 3-year warranty as standard.

Ludo Chapman, managing director of Grant Instruments, said: "We have listened to our global customers and distributors, and we have managed - despite the current economic downturn - to design a new, feature-rich range of precision engineered water baths without compromising the great quality, service & support and competitive price for which we are renowned."

The Aqua Plus family of water baths complements the existing Grant Optima™ series of stirred thermostatic baths and heating circulators and is part of Grant's comprehensive range of scientific products. This includes block heaters and coolers, baths/circulators and re-circulating chillers, and under the **Grant-bio** brand, thermoshakers, rockers, rotators and shakers, centrifuges and vortex mixers.
