Many Challenges...One **Solution**

# HARVARD

---

## A P P A R A T U S

Providing Exceptional Solutions for Your Bioresearch Challenges

### **NEW PRODUCT RELEASE**

**When You Really Need to Know  
If Your Model is Correct!**

*You Need 3D and Space-filling CPK  
Atomic Models available  
exclusively from Harvard  
Apparatus*

Harvard Apparatus, under license

from the American Society for Biological Chemists, is the exclusive worldwide provider of CPK models.

The accuracy, scale and ease-of-use of CPK atomic models make them superior to other model systems. They can be assembled, disassembled and reassembled easily using simple construction tools.

CPK atomic models are offered in three different formats: as individual atoms, connectors and accessories; as sets for construction of specific molecules; and as pre-assembled molecular models, e.g., amino acids, purine and pyrimidine bases, nucleosides, nucleic acid helices, fatty acids and derivatives, enzyme cofactors, water and fat soluble vitamins and many more.

CPK models are effective teaching tools, great tools for new drug presentations and allow you to visualize chemical structures for enhanced understanding. They are also extremely durable and provide true 3D and spatial perspectives of molecules, not available in computer simulations.

For more information please go to [www.harvardapparatus.com](http://www.harvardapparatus.com) or contact:

### **Harvard Apparatus**

84 October Hill Road

Holliston, Massachusetts 01746 USA
