

Stylish and Sleek

Stuart[®] Digital Round-Top Stirring Hot Plates

Cole-Parmer are causing a stir by complimenting and completing the Stuart range with the [Digital Round-Top Stirring Hot Plates](#). Valued customers now have a comprehensive choice of units designed to suit a number of applications. These NEW Stuart[®] additions comprise three different models: **hot plate, stirrer or stirring hot plate**, all with a **digital display**.

These stylish and sleek instruments feature a unique control pad that allows all operations to be set using just your fingertip. An LCD shows both set and real-time parameters which are lockable to prevent accidental changes during use. Multiple stirring options allow a choice between one direction or reversing every 45 seconds for thorough mixing. A built-in timer can be set for up to 9 hours or continuous operation. Optimal heating is produced by an integrated temperature sensor and dual PID control that rapidly heats the 135-mm diameter, ceramic, round-top plate and maintains the desired temperature. Dual temperature control circuit also ensure temperature stability in case one circuit malfunctions. Safety features include user-set safety temperature limit through main control panel, hot warning light indicator, and digital error code functions for easy troubleshooting.

"This year we proud ourselves to have heavily modernised and grown the family of Stuart[®] Hot Plate Stirrers, while maintaining the same reliability, precision and affordability that made the success of the brand over the years. With the addition of the new Digital Round-Top Stirring Hot Plates we now offer one of the most comprehensive range of Hot Plate Stirrers available on the market today. These Hot Plate Stirrers are affordable instruments with uncompromised heat transfer, whilst being suited to meet all user needs and range of applications", commented Renaud Foret, Category Manager."

Each unit is robust and has a host of user-friendly features:

- Innovative fingertip control even while wearing gloves
- Advanced brushless motor provides quiet and worry-free operation
- Sealed exterior keeps spills away for maintenance free operation
- Dual timer modes for more accurate control
- Maximum temperature 340°C

Notes to editors

Since 1955, Cole-Parmer has been a leading global source of Fluid Handling, Test & Measurement and Biosciences products, instrumentation, equipment and supplies. We are proven experts in the fields of temperature measurement, spectroscopy, fluid handling, sample preparation & handling and chromatography. Our products & instruments are used extensively in the industrial, pharmaceutical, life sciences, environmental and food & beverage industries. Our portfolio of unique industry-leading brands includes Argos Technologies[®], Digi-Sense[®], Electrothermal[®], Environmental Express[®],
