

**Leman Instruments Introduces new Family of High Purity Oxygen Generators
New OXYSTATION 20 LC and OXYSTATION 40LC Instruments now available**

Responding to requests from end users in the analytical field, Leman Instruments has developed the new OXYSTATION line of instruments with improved features.

The new OXYSTATION 20LC and OXYSTATION 40LC are high purity oxygen generators and provide :

- ✓ Low operation costs.
- ✓ Excellent reproducibility of measurements and high pressure stability.
- ✓ Oxygen available 24/7 at constant purity and without contamination.
- ✓ An independent source of O₂ that can be easily moved around the laboratory and does not require any piping.
- ✓ Remote control from PC, I-phone and Tablet.

The OXYSTATION 20LC is suitable for any application involving O₂ and the OXYSTATION 40LC system, with on board compressor, is intended for the following applications:

- ✓ Makeup gas for GC
- ✓ ICP, ELSD, CORONA, PID
- ✓ Protection gas for cell culture
- ✓ Carrier gas for calibrators

Each instrument is equipped with high performance communication interfaces (USB, RS485, Ethernet and WLAN) to create a flexible gas network with local or central control. Due to the software the OXYSTATION 20LC and 40 LC are easy to install, reliable, safe and pleasant to operate.

Corporate Profile :

LEMAN INSTRUMENTS is a leading European company, specialized in standard products, OEMs and in custom designed realisations involving High Purity H₂, N₂ Zero Air, combined solutions for FIDs, GCs, purge Air generators, CH₄ & CO₂ scrubbers, N₂ and multigas for LCMS with high level of communications involving Ethernet, USB, RS 485 and possibility of AK protocol integration.
