

Automate Your SOP with Beckman Coulter Quality Control Instruments

To improve your QC data integrity for audits

[Learn More](#)

"Data integrity refers to the completeness, consistency and accuracy of data. Complete, consistent and accurate data should be attributable, legible, contemporaneous recorded, original or true copy and accurate (ALCOA)."¹

CHARACTERIZED
by integrity.

We want to help you automate some of these common QC steps:

- Environmental monitoring
- Purified water (PW) analysis
- Water for injection (WFI) analysis
- Monitoring cell viability
- Final product quality testing
- API / excipient powder granule sizing
- Clean in place processes (CIP) analysis
- Mammalian cell bioreactor media health

Get in touch with your local expert to find out how you can improve your data integrity.
