

Max Resistance² - Now best in class

If you are looking for a worktop panel that resists even the most aggressive chemicals in the extreme working conditions of the laboratory sector, there is only one choice: **Max Resistance²**. A product improvement of the established FunderMax worktop panels.

Because the surface, protected with a double cured urethane acrylic coating, has proven itself to be unaffected by solvents and aggressive chemicals, easy to clean and disinfect, it extends the serviceable life of your equipment (worktop, panels, walls, tables etc.) enormously.

Additional benefits

Max Resistance² is both chemical-resistant and highly mechanical resistant. If you know the heart of the matter, you will immediately understand why. Max Resistance² consists of approved and tested raw materials, produced under high temperature and pressure they emerge as a unique compact laminate core to a homogenous decorative panel. Manufactured without joints and fully enclosed it is therefore permanently resistant against moisture penetration.

Applications

Ideal for all types of laboratories, in the hygienic sector, for research centres, hospitals or doctor's surgery, photo laboratories, the foodstuffs industry, schools, pharmaceutical industry and everywhere, where absolute cleanliness of highly resistant surface is demanded. Contact with highly concentrated acids like Nitric or Hydrochloric Acid do not change the surface or color at all, which is unique compared to all other compact worktops on the market.

Collection

A deep black core. No need for treatment or sealing. Max Resistance² comes with double sided decor and finish for maximum flatness and minimized off-cuts in fabrication. Peelable protective film on both sides for maximum protection during transport, fabrication and installation.

More decors available

There are many more decors available in the standard range of decors with FH surface.

Processing recommendations

The Max Resistance² panel is very easy to machine and to install in difference to other materials. For special and detailed information about processing recommendations please visit our website www.fundermax.at.

About FunderMax

FunderMax is one of Europe's leading providers of quality wood materials and decorative laminates. The company's product range covers chipboards to coated chipboards (Star Favorit) in the latest designs, all the way to high-pressure laminate (HPL) and Compact panels (Max Exterior and Interior Max) and the m.look facade panel in A2 quality. The company has production facilities at three locations in Austria (St. Veit/Glan, Wiener Neudorf and Neudörfel). Approximately 1,000 employees generated approximately 334 million euros in turnover for 2013. FunderMax is owned by the Constantia Industries AG, one of the largest industrial groups in Austria.

In 2011, FunderMax was honored for its environmental commitment with the TRIGOS 2011, the most important Austrian award for social responsibility.
