

GET A FREE DEMO OF THE VANEUX PELLET PRESS FROM FLUXANA (GERMANY)

With over 200 units sold world-wide; the Vaneox is fast becoming the industry standard for preparing pellets for XRF applications.

You can prepare 32 mm dia. pellets from your own samples on the 15 T Manual Vaneox at a demo lab in Dubai. We have a variety of binding material like Boreox, Cereox and Celleox from which you can choose and get the best quality pellet as per your sample mineralogy.

Please call on 050-6599 534 or write to us at info-me@quantum.company to organize the free demo.
