

## Adam Equipment's LabStation Improves Precision and Efficiency in Lab Testing

*Innovative product combination unites Adam's certified calibration weights and AVT anti-vibration table with Nimbus analytical and precision balances*

Adam Equipment introduces the LabStation, an ingenious combination of Adam products that brings a blend of efficiency to labs worldwide. LabStation unites the streamlined precision of Nimbus balances, the rock-solid stability of the AVT anti-vibration table, and the flawless reliability of OIML/ASTM certified weights.

With intuitive operation, Nimbus analytical and precision balances offer a full breadth of readabilities ranging from 0.1mg to 0.1g. Innovative design enables a compact footprint, so the Nimbus occupies minimal space but retains the highest level of performance. Nimbus is available with internal and external calibration. Three- and four-decimal Nimbus units work seamlessly with the AVT to provide the superior performance and precision needed in demanding labs.

Featuring a remarkably durable granite base that rests on shock-absorbing rubber mounts, the AVT anti-vibration table is designed to minimise the effects of vibration during lab balance operation. The AVT allows balances to perform with marked precision, despite any movements or air currents that might cause inconsistent or inaccurate results. Its sturdy aluminum construction offers outstanding stability. AVT features a convenient working surface for placing samples, weights, pipettes, or other lab items.

Certified to OIML and ASTM standards, Adam calibration weights are fabricated of highly polished stainless steel. Available separately or in sets, Adam's certified weights are used to calibrate high-precision analytical balances that must meet certain traceability requirements.

### **About Adam Equipment**

For 45 years, Adam Equipment has designed and manufactured precision balances and scales for professionals worldwide in the laboratory, medical, education, industrial, food, animal/veterinary and jewellery markets. Adam is committed to offering an extensive selection of weighing equipment with best-in-class value. Headquartered in the United Kingdom, the company has strategically established offices in the United States, South Africa, Australia, China and Germany to provide product support and speedy delivery to distributors. For more information about the company and its products, go to [www.adamequipment.com](http://www.adamequipment.com).
