

Reagecon is one of the largest producers of Physical and Chemical Standards and Certified Reference Materials worldwide. Certified Reference Materials are manufactured under the scope of our ISO Guide 34 accreditation and Standards are tested and certified to ISO17025. Products are traceable to International bodies eg NIST and OIML. Our Standards are used extensively by the Pharmaceutical, Food, Environmental, Petrochemical and Industrial sectors for Calibration, Validation, Qualification and Control of instrumentation and methods. All products at Arablabs are showcased in our innovative new Physical & Chemical Standards Compendium, detailing extensive commercial, technical, application and industry specific information for our Standards.
