

## **New Brochure Features a Wide Range of Autoclaves and Media Preparators**

Systemec GmbH's new product brochure is available now. The brochure has been redesigned and provides an overview of our wide product range of autoclaves and media preparators. Customers can choose from over 70 different autoclaves, with chamber volumes ranging from 23 to 1580 litres, universal installation options as floor standing and bench-top units and numerous additional options.

The brochure also includes an overview of the Systemec Mediafill dispensing and dosing system as well as the Systemec Mediaprep media preparators (nutrient medium preparators and nutrient medium sterilisers), which have been optimised for the preparation, sterilisation and sterile filling of liquids, such as agar culture media, peptone water and buffer solutions or other sterile liquid media. These are available in seven sizes with capacities ranging from 10 to 120 litres of media.

Customers can rely on Systemec's 24 years of expertise in the fields of steam sterilisation and process development, even of the most complex autoclave processes.
