

**Press releases for Arab Lab 2018**

**Medi-Test URYXXON® 500 from MACHEREY-NAGEL**

The URYXXON® 500 is able to reliably and safely analyze up to 400 urine test strips per hour and is the logical further development of our classic URYXXON® 300. The URYXXON® 500 impresses with intuitive user guidance and a modern touch screen, which makes navigating the clearly structured menus very easy. The high-precision optics provide accurate results anytime, irrespective of the subjectivity of visual color interpretation. Please visit our homepage to learn more about our URYXXON® 500!

**Photometer NANOCOLOR® PF-12<sup>Plus</sup> from MACHEREY-NAGEL**

The NANOCOLOR® PF-12<sup>Plus</sup> Photometer is a device tailored for the mobile analysis. The icon-based menu guidance and clear taskbar make the PF-12<sup>Plus</sup> an easy to use photometer for all fields of water and waste water analysis without the need for extensive training. The device comes in a rugged case equipped with useful accessories and is therefore particularly popular with users for the direct analysis at the point of interest. With its especially positioned 860 nm LED the PF-12<sup>Plus</sup> enables nephelometric turbidity measurements (NTU) in the range of 1-1000 NTU. Therefore, disturbing turbidities will be detected reliably in parallel to a measurement of our NANOCOLOR® tube tests.

## Spectrophotometer *NANOCOLOR*<sup>®</sup> VIS II from MACHEREY-NAGEL

---

With the new *NANOCOLOR*<sup>®</sup> VIS II Spectrophotometer from MACHEREY-NAGEL, powerful performance meets a fantastic user experience. It is designed to deliver more safety and accuracy when analyzing the most important substance in the world – our water. The *NANOCOLOR*<sup>®</sup> VIS II spectrophotometer impresses with high-class technology and optics. As comprehensive spectrophotometer, the *NANOCOLOR*<sup>®</sup> VIS II meets all requirements of your daily laboratory work.
