

## Proteomics of Shellfish Allergens: Using LC-MS to Detect Important Food-Borne Allergens

It's not always easy to tell when certain allergens are present in food. Despite regulations in many countries requiring food manufacturers to include allergen warnings on product labels, there are some instances where trace amounts of allergens slip through the cracks. That's why you should catch this webinar.

### What you'll learn:

- Gain an understanding of the importance of food testing and food labeling
- Learn about a specific process used for extracting proteins from prawn and oyster tissue
- Gather a greater understanding of the process involved in developing a new food testing assay using LC-MS
- Learn about the application of proteomics to food analysis from international expert
