

CHOOSING THE RIGHT MODEL TO SIMPLIFY YOUR LAB'S R&D AND QUALITY INITIATIVES

With countless systems, workflows, and vast amounts of data, managing laboratory operations is hard. Take the complexity out of your R&D and quality initiatives so you can get to market faster with STARLIMS.

With the latest addition of the Labstep ELN, STARLIMS offers a complete R&D and quality manufacturing informatics platform that supports your full product lifecycle, while giving you a holistic view of your laboratory operations.

By combining our ELN, LIMS, SDMS, LES, and Advanced Analytics solutions into one platform, STARLIMS helps you accelerate time to market by automating processes, seamlessly integrating tools and systems, and extending data collection beyond the lab with one system, and one partner.

As a recognized leader in enterprise informatics solutions, STARLIMS is committed to providing quality products and services to over 1,100 customers across the globe. Found in over 2,000 laboratories, STARLIMS serves Life Sciences, Contract Development Manufacturing Organizations (CDMOs), Food & Beverage, Chemical, Agrochemical, Oil & Gas, Consumer Goods, Contract Testing, Public Health, and Clinical Diagnostics organizations. With a modern and intuitive R&D ELN incorporated into the portfolio, STARLIMS address the critical challenges customers face in finding an advanced platform that supports them from R&D through to commercialization.
