

Distillation Plant with Glass Lined Reactor

For production scale chemical synthesis , distillation , solvent recovery , rectification processes, Glass Shell & Tube Condensers are used along with Glass Lined Reactors. Complete process piping is also made of borosilicate glass 3.3 These plants usually operate under vacuum.

Salient Features

- Suitable for operation under high vacuum and low pressure
- Setup can be configured up to 600 DN for large size reactors
- Visual monitoring of process, improving safety and reliability of production
- Customized compact design as per available space
- Measure and control devices can be easily equipped
- High corrosion resistant Coupling and Fasteners
- Shell and Tube type Heat Exchanger available up to 50m² for improved heat transfer efficiency
