

HIGH PURITY ACID FOR TRACE ANALYSIS

Loba Chemie offers a full range of high purity acids. This is required sample preparation for the Critical trace metal analysis.

To assist you with trace element analysis procedures, ACIPUR Acids are tested to PPB (parts per billion) levels.

Products are double-distilled and packed in clean room condition.

The ACIPUR Acids also meet or exceed ACS specifications to provide the ultimate in performance at this grade level.

Acipur

HYDROCHLORIC ACID

PERCHLORIC ACID

SULPHURIC ACID
